## **TREE PLANTATION**

As if the logistical challenges of planting millions of trees were not enough, add into the mix a global public health crisis, unlike anything the world has seen in generations. The Coronavirus pandemic (COVID-19) has taken an immense toll on the lives and well-being of many and created unprecedented challenges to on-the-ground forestry and conservation efforts.

The National Service Scheme (NSS) Unit of Institute of Pharmaceutical Education and Wardha organized “Tree Plantation” programme on 12th July 2020 in the college premises. It was attended by Dr. R. O. Ganjiwale, Principal; Dr. N. A. Karande, NSS Programme Coordinator; and NSS student volunteers. Under the Guidance of Asst. Prof. Dr. N. A. Karande, NSS Program Coordinator, 110 student’s volunteers planted trees.

## CAMP FOR COVID-19

### (RTPCR & RAPID ANTIGEN TEST)

Coronavirus disease (COVID-19) is an infectious disease caused by a newly discovered coronavirus. Most people infected with the COVID-19 virus will experience mild to moderate respiratory illness and recover without requiring special treatment. Older people, and those with underlying medical problems like cardiovascular disease, diabetes, chronic respiratory disease, and cancer are more likely to develop serious illness.

The best way to prevent and slow down transmission is to be well informed about the COVID-19 virus, the disease it causes and how it spreads. Protect yourself and others from infection by washing your hands or using an alcohol based rub frequently and not touching your face.

The National Service Scheme (NSS) unit of the Institute organize camp for Covid-19 (RTPCR and Rapid antigen test) on 1<sup>st</sup> April 2021 at 11.30 am. For the camp a team of Community Health officer, Borgaon(Meghe), Wardha visited to institute. The villagers from adopted under Unnat Bharat Abhiyan (UBA) Borgaon(Meghe), Inzapur, Sawangi(Meghe), Nalwadi and Warud participated in camp. On the day of camp RTPCR and rapid antigen test of 68 villagers performed.

Illustrative plot of sample (JNMC/COV/30845/2021) did not show any amplification curve in E gene, ORF1ab, RPP as per the cut off value mentioned in I

with reference to the specimen tested and should be correlated with clinical findings (symptomatic patients).  
 Copy of original clinical sample was transferred on the basis of request received from State Surveillance Officer (SSO) of concerned State Integrated Disease Surveillance & Response Cell.  
 The case facility adhering requirements of the case definition.  
 ICMR requires a new mask, particularly if this is from an upper respiratory tract specimen, to ensure infection control and prevent cross-contamination of other specimens.  
 All sampling and testing of lower respiratory specimens is strongly recommended to ensure or progressive disease. Report specimens may be considered after a gap of 24 days after last  
 from for additional testing if required.  
 It must be used in its form for any direct or presentation or for publication in any journal without the prior permission of the Director General, ICMR.
